Helena, MT 59620-1001

Memorandum

To: District Construction Supervisors

From: Robert D. Tholt, PE
Construction Engineer

Date: June 16, 2001

Subject: Traffic Control Device Item
Install or Remove Signs on Post Mounts

The subject item, located in the Traffic Control Rate Schedule, is for any permanent traffic control device that must be removed or replaced due to a seasonal break in the construction activities.

An example would be the removal of a G20-1 Road Work Ahead sign at the time of winter shutdown.

As stated in Standard Specification Section 618, covering or removing non-applicable signs or signs not in use are not eligible for separate payment. This includes closing hinged signs or removing non-hinged signs not in use or applicable.

If you have any questions or require additional information, please contact me.
